

BIG

Boys Toys

The Big Boys Toys package is ideal for the group who have done it all before. The format involves the guests driving or controlling a variety of BIG vehicles under the careful supervision of experienced instructors.

The event is very flexible regarding duration. For a small group of up to 18 guests a half-day session works well – three teams circulating around three activities.

For larger groups, or for a full day event, six activities can be incorporated – capable of entertaining up to 36 guests. For larger groups the activities can simply be doubled up.

Some of the favourite activities to incorporate include:

360° Digger Challenge

The 360° digger is the king of the construction site. These huge machines can scoop up tonnes of soil at a time and swivel on the spot.

The challenge is to dig a hole using the articulated arm, controlled by two joysticks in the cab. This is a true test of coordination.

Tractor Driving

Drive a full size tractor around an challenging course. These vehicles are designed for the harshest conditions and can prove to be a real challenge to drive.

9 Tonne Dumper Truck

These vehicles are used to transport earth, rubble and sand around building sites. Capable of carrying 9 tonnes at a time they are impressive bits of kit. The participants will drive the vehicles around a mud track and then tip the contents of the bucket (a football) into a collection bin. Scores will be awarded for the number of balls collected.

The Yorkie Bar Experience

Drive this monster 40 foot articulated lorry around our internal roads and have a go at reversing – it'll make you appreciate those boys delivering in towns! Everyone has always wanted to have a go at being a trucker – go on, admit it!

Telescopic Handler

This incredibly versatile vehicle can be seen on construction sites and farmyards across the world. They have the lifting abilities of a forklift truck and the off road ability of a Landrover combined into one vehicle. The challenge is to lift a loaded pallet from the ground and place it on top of a seven metre high platform.
